Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. General marking guidance

These notes offer general guidance, but the specific notes for examiners appertaining to individual questions take precedence.

1 All candidates must receive the same treatment. Examiners must mark the last candidate in exactly the same way as they mark the first.

Where some judgement is required, mark schemes will provide the principles by which marks will be awarded; exemplification/indicative content will not be exhaustive. When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the response should be sent to review.

2 All the marks on the mark scheme are designed to be awarded; mark schemes should be applied positively. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme. If there is a wrong answer (or no answer) indicated on the answer line always check the working in the body of the script (and on any diagrams), and award any marks appropriate from the mark scheme.

Questions where working is not required: In general, the correct answer should be given full marks.
Questions that specifically require working: In general, candidates who do not show working on this type of question will get no marks – full details will be given in the mark scheme for each individual question.

3 Crossed out work

This should be marked **unless** the candidate has replaced it with an alternative response.

4 Choice of method

If there is a choice of methods shown, mark the method that leads to the answer given on the answer line.

If no answer appears on the answer line, mark both methods **then award the lower number of marks.**

5 Incorrect method

If it is clear from the working that the "correct" answer has been obtained from incorrect working, award 0 marks. Send the response to review for your Team Leader to check.

6 Follow through marks

Follow through marks which involve a single stage calculation can be awarded without working as you can check the answer, but if ambiguous do not award.
Follow through marks which involve more than one stage of calculation can only be awarded on sight of the relevant working, even if it appears obvious that there is only one way you could get the answer given.

7 Ignoring subsequent work

It is appropriate to ignore subsequent work when the additional work does not change the answer in a way that is inappropriate for the question or its context. (eg. an incorrectly cancelled fraction when the unsimplified fraction would gain full marks).

It is not appropriate to ignore subsequent work when the additional work essentially makes the answer incorrect (eg. incorrect algebraic simplification).

8 Probability

Probability answers must be given as a fraction, percentage or decimal. If a candidate gives a decimal equivalent to a probability, this should be written to at least 2 decimal places (unless tenths).

Incorrect notation should lose the accuracy marks, but be awarded any implied method marks.

If a probability fraction is given then cancelled incorrectly, ignore the incorrectly cancelled answer.

9 Linear equations

Unless indicated otherwise in the mark scheme, full marks can be gained if the solution alone is given on the answer line, or otherwise unambiguously identified in working (without contradiction elsewhere). Where the correct solution only is shown substituted, but not identified as the solution, the accuracy mark is lost but any method marks can be awarded (embedded answers).

10 Range of answers

Unless otherwise stated, when an answer is given as a range (e.g 3.5 – 4.2) then this is inclusive of the end points (e.g 3.5, 4.2) and all numbers within the range.

11 Number in brackets after a calculation

Where there is a number in brackets after a calculation E.g. 2 × 6 (=12) then the mark can be awarded **either** for the correct method, implied by the calculation **or** for the correct answer to the calculation.

12 Use of inverted commas

Some numbers in the mark scheme will appear inside inverted commas E.g. "12" × 50 ; the number in inverted commas cannot be any number – it must come from a correct method or process but the candidate may make an arithmetic error in their working.

13 Word in square brackets

Where a word is used in square brackets E.g. [area] × 1.5 : the value used for [area] does **not** have to come from a correct method or process but is the value that the candidate believes is the area. If there are any constraints on the value that can be used, details will be given in the mark scheme.

14 Misread

If a candidate misreads a number from the question. Eg. uses 252 instead of 255; method or process marks may be awarded provided the question has not been simplified. Examiners should send any instance of a suspected misread to review.

Guidance on the use of abbreviations within this mark scheme	
M	method mark awarded for a correct method or partial method
P	process mark awarded for a correct process as part of a problem solving question
A	accuracy mark (awarded after a correct method or process; if no method or process is seen then full marks for the question are implied but see individual mark schemes for more details)
C	communication mark
B	unconditional accuracy mark (no method needed)
oe	or equivalent
cao	correct answer only
ft	follow through (when appropriate as per mark scheme)
sc	special case
dep	dependent (on a previous mark)
indep	independent
awrt	answer which rounds to
isw	ignore subsequent working

1	$\frac{17}{100}$	B1	for $\frac{17}{100}$ or any other equivalent fraction	
2	2 hours 20 minutes	B1	cao	
3	0.05, 0.5, 0.507, 0.57	B1	for 0.05, 0.5, 0.507, 0.57	Accept reverse order
4	hexagon	B1	cao	
5	3	B1	cao	
6	10	P1 P1 A1	for process to find greatest number of bracelets for one colour, eg 52 ÷ 5 (= 10(.4)) **or** 80 ÷ 7 (= 11(.4..)) for process to find greatest number of bracelets for both colours, eg 52 ÷ 5 (= 10(.4)) **and** 80 ÷ 7 (= 11(.4..)) cao	May be seen as a repeated addition or subtraction but must be complete for one colour, eg 50 or 70 May be implied by eg 50:70 or 50:77 Must see working with both colours for this mark.
7 (a)	12	M1 A1	for method to find mean, eg (14 + 10 + 10 + 13 + 15 + 9 + 15 + 10) ÷ 8 **or** 96 ÷ 8 cao	Allow one error or omission but must divide by 8
(b)	6	M1 A1	for 15 – 9 **or** 9 – 15 **or** 9 to 15 cao	Condone eg 9, 15 but not 9 + 15
(c)	cross at ¼	B1	for cross (or mark) at ¼	Accept any mark near to ¼ if the intention is clear; do not accept if additional marks are shown

Question	**Answer**	**Mark**	**Mark scheme**	**Additional guidance**
8 (a)	No and reason	C1	No **and** reason **Acceptable examples** No, because $10^2 = 100$ **or** 10^2 is 10×10 $4^2 = 16$ and $5^2 = 25$ so 20 is not a square number Junaid is wrong because $\sqrt{20} \neq 10$ **or** $\sqrt{20} = 4.47...$ Incorrect because 20 is 2×10 not 10×10 No she multiplied by 2 instead of squaring **or** 10^2 is not 10×2 Wrong as she added instead of multiplying **Not acceptable examples** Yes…. No because 20 is 10×2 Incorrect because 20 is not a square number No because 10^2 is not 20 No because she added No because a square number is when a number is multiplied by itself	
(b)	example	C1	for a correctly evaluated example, eg $12 \div 4 = 3$ or $10 \div 2 = 5$ or $2 \div 4 = 0.5$	Accept rounded and truncated values, eg $2 \div 6 = 0.3(..)$, $100 \div 6 = 16.6(..)$
9	3 : 5	M1	for 90 : 150 oe ratio **or** 5 : 3	eg 30 : 50, 15: 25, 9 : 15
		A1	cao	Accept 3 : 5 in the form n : 1, eg 0.6 : 1 **or** 1 : n, eg 1 : 1.66(…)

Modifications to the mark scheme for Modified Large Print (MLP) papers: 1MA1 2F

Only mark scheme amendments are shown where the enlargement or modification of the paper requires a change in the mark scheme. Notes apply to both MLP papers and Braille papers unless otherwise stated.

The following tolerances should be accepted on marking MLP papers, unless otherwise stated below:
Angles: ±5º
Measurements of length: ±5 mm

PAPER: 1MA1_2F			
Question		**Modification**	**Mark scheme notes**
3		Wording added: 'four'	Standard mark scheme
4		Wording 'this polygon' removed and replaced with 'the polygon below'. Diagram enlarged and left aligned.	Standard mark scheme
7	(c)	Wording added: 'Look at the diagram for Question 7(c) in the Diagram Booklet. It shows a probability scale.' Word 'below' removed and replaced with 'in the Diagram Booklet'. Wording removed: 'with a cross (x)'. Diagram enlarged. For Braille: sentence added 'Bumpons are provided if you wish to use them.'	Standard mark scheme
10		Wording changed: 'Look at the diagram for Question 10 in the Diagram Booklet. It shows a square and shape A.' Wording 'the shape below' removed and replaced with 'shape A as shown in the Diagram Booklet.' Wording 'this shape' removed and replaced with 'shape A'. Diagrams enlarged. Wording added to the diagrams 'Diagrams NOT accurately drawn' Shapes labelled 'square' and 'shape A'.	Standard mark scheme
11	(a) (b)	Letter changed: 'x' to 'w'. Letters changed: 'd' to 'p' and 'e' to 'q'.	B1 for $6wy$ M1 for $5p$ **or** $-3q$ A1 for $5p - 3q$

PAPER: 1MA1_2F			
Question		**Modification**	**Mark scheme notes**
13		Wording changed: 'Look at the diagram for Question 13 in the Diagram Booklet. It shows triangle ABC' Wording added: 'The reflex angle BAC = 310° Angle ACD = 115°' Diagram enlarged. Angles moved outside of angle arcs and angle arcs made smaller.	Standard mark scheme
14		Wording added: 'Look at the diagram for Question 14 in the Diagram Booklet. It shows an incomplete travel graph.' Wording 'below' removed and replaced with 'in the Diagram Booklet'. Diagram enlarged. Graph cropped at 7pm on the horizontal axis. Open headed arrows.	
	(b)	Wording added: 'in the Diagram Booklet.' For Braille: sentence added 'Bumpons and drawing film are provided if you wish to use them.'	Standard mark scheme
18		Wording added: 'Look at the diagram for Question 18 in the Diagram Booklet. It shows triangle A and triangle B on a grid.' Diagram enlarged. Open headed arrows. Shading changed. Shapes labelled 'triangle A' and 'triangle B'	Standard mark scheme
19	(b)	Wording added: Look at the diagram for Question 19(b) in the Diagram Booklet. It shows a number line. Wording 'below' removed and replaced with 'in the Diagram Booklet'. Diagram enlarged. Open headed arrow. For Braille: sentence added 'Bumpons and drawing film are provided if you wish to use them.'	Standard mark scheme

PAPER: 1MA1_2F			
Question		**Modification**	**Mark scheme notes**
21		Wording changed: 'Look at the diagram for Question 21 in the Diagram Booklet. It is a scatter graph showing information about some ships.' Diagram enlarged. Crosses changed to dots. Vertical axis cropped so it starts at 15. Open headed arrows. m changed to metres.	
	(b)	Wording added: 'in the Diagram Booklet' For Braille: sentence added 'Drawing film is provided if you wish to use it.'	Standard mark scheme
	(c)	Value '194' changed to '190'.	Standard mark scheme
22		Information in boxes removed. g changed to gram.	Standard mark scheme
23		Wording added: 'Look at the diagram for Question 23 in the Diagram Booklet. It shows a Venn diagram.' Wording 'Here is his answer.' removed and replaced with 'His answer is shown in the Diagram Booklet.' Diagram enlarged. Numbers arranged in two rows.	Standard mark scheme
24	(a)	Word added 'below'. Wording added 'There are five spaces to fill.' Table enlarged, turned vertically and left aligned. For Braille: missing values labelled (i), (ii), (iii), (iv) and (v)	Standard mark scheme
	(b)	Wording added: 'Look at the diagram for Question 24(b) in the Diagram Booklet. It shows a grid.' Diagram enlarged. Open headed arrows. Vertical axis cropped at -5. For Braille: sentence added 'Bumpons and drawing film are provided if you wish to use them.'	Standard mark scheme

PAPER: 1MA1_2F			
Question		**Modification**	**Mark scheme notes**
25		p changed to pence.	Standard mark scheme
26		Wording changed: 'Look at the diagram for Question 26 in the Diagram Booklet. It…' Wording added: 'AC = 2x + 11 AB = 2x + 5 BC = 4x – 4' Diagram enlarged. Lines on the sides made longer.	Standard mark scheme
28		Wording added: 'Look at Diagram 1, Diagram 2 and Diagram 3 for Question 28 in the Diagram Booklet. You may be provided with a model. They are NOT accurate. Diagram 1 and the model show a solid cylinder with base radius 3 cm and height 10 cm. Diagram 2 shows the base of the cylinder. Diagram 3 shows the side of the cylinder.' g changed to grams. Model provided. Diagram enlarged. 2 additional 2D diagrams added. Open headed arrows.
